AB
     A review on inhibition of the interaction between the cytokine tumor
     necrosis factor \alpha ( TNF-\alpha ) and TNF-\alpha
     receptor 1 (TNFR1). Identification is discussed of a small mol. that
     inhibits the interaction of TNF-\alpha and TNFR1. The new
     TNF-\alpha inhibitor is composed of a trifluoromethylphenyl
     indole and a di-Me chromone moiety which are linked by a
     dimethylamine spacer.
